

# Kibana Canvas

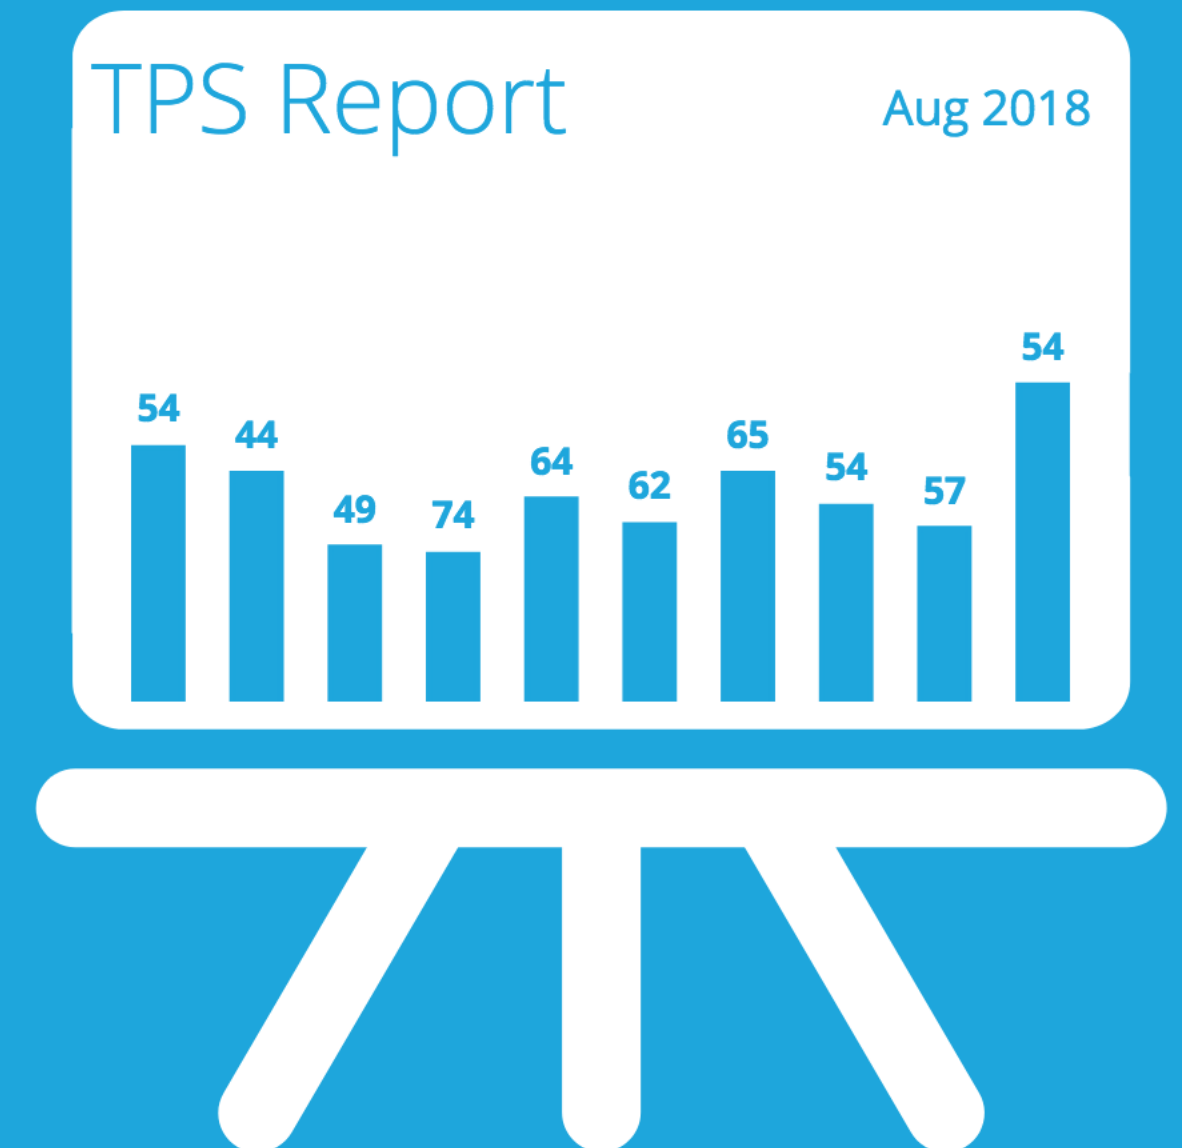

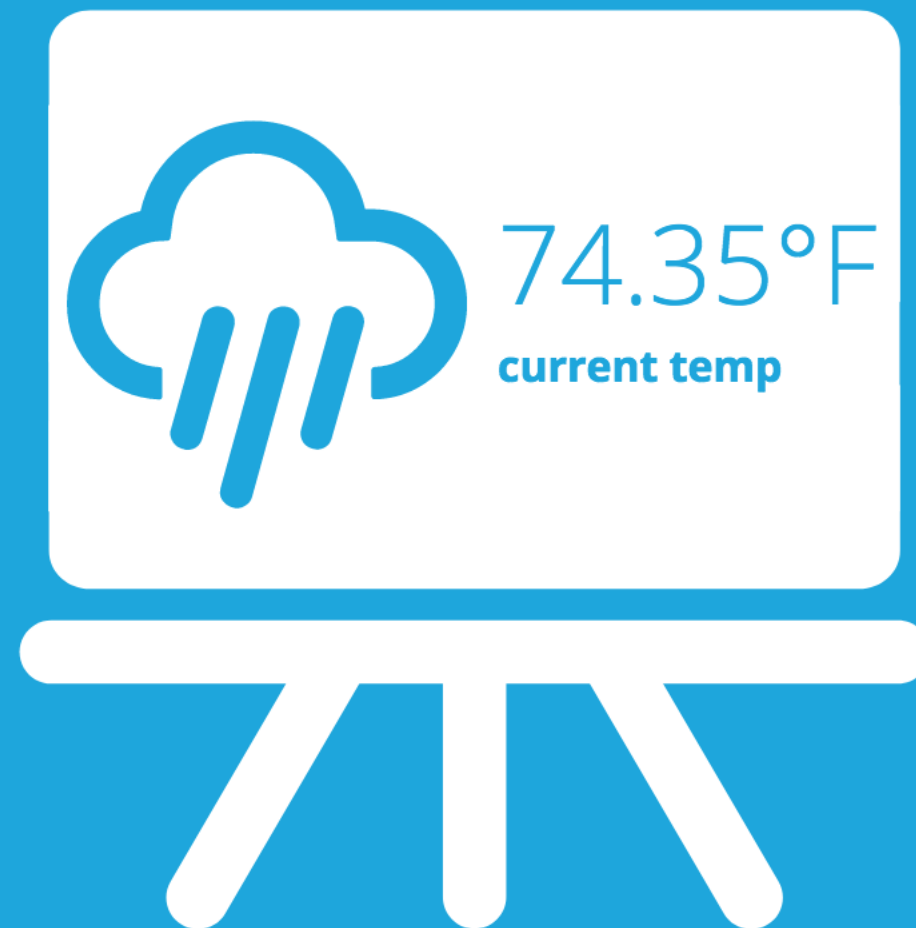

Brought to you by Alex Francoeur

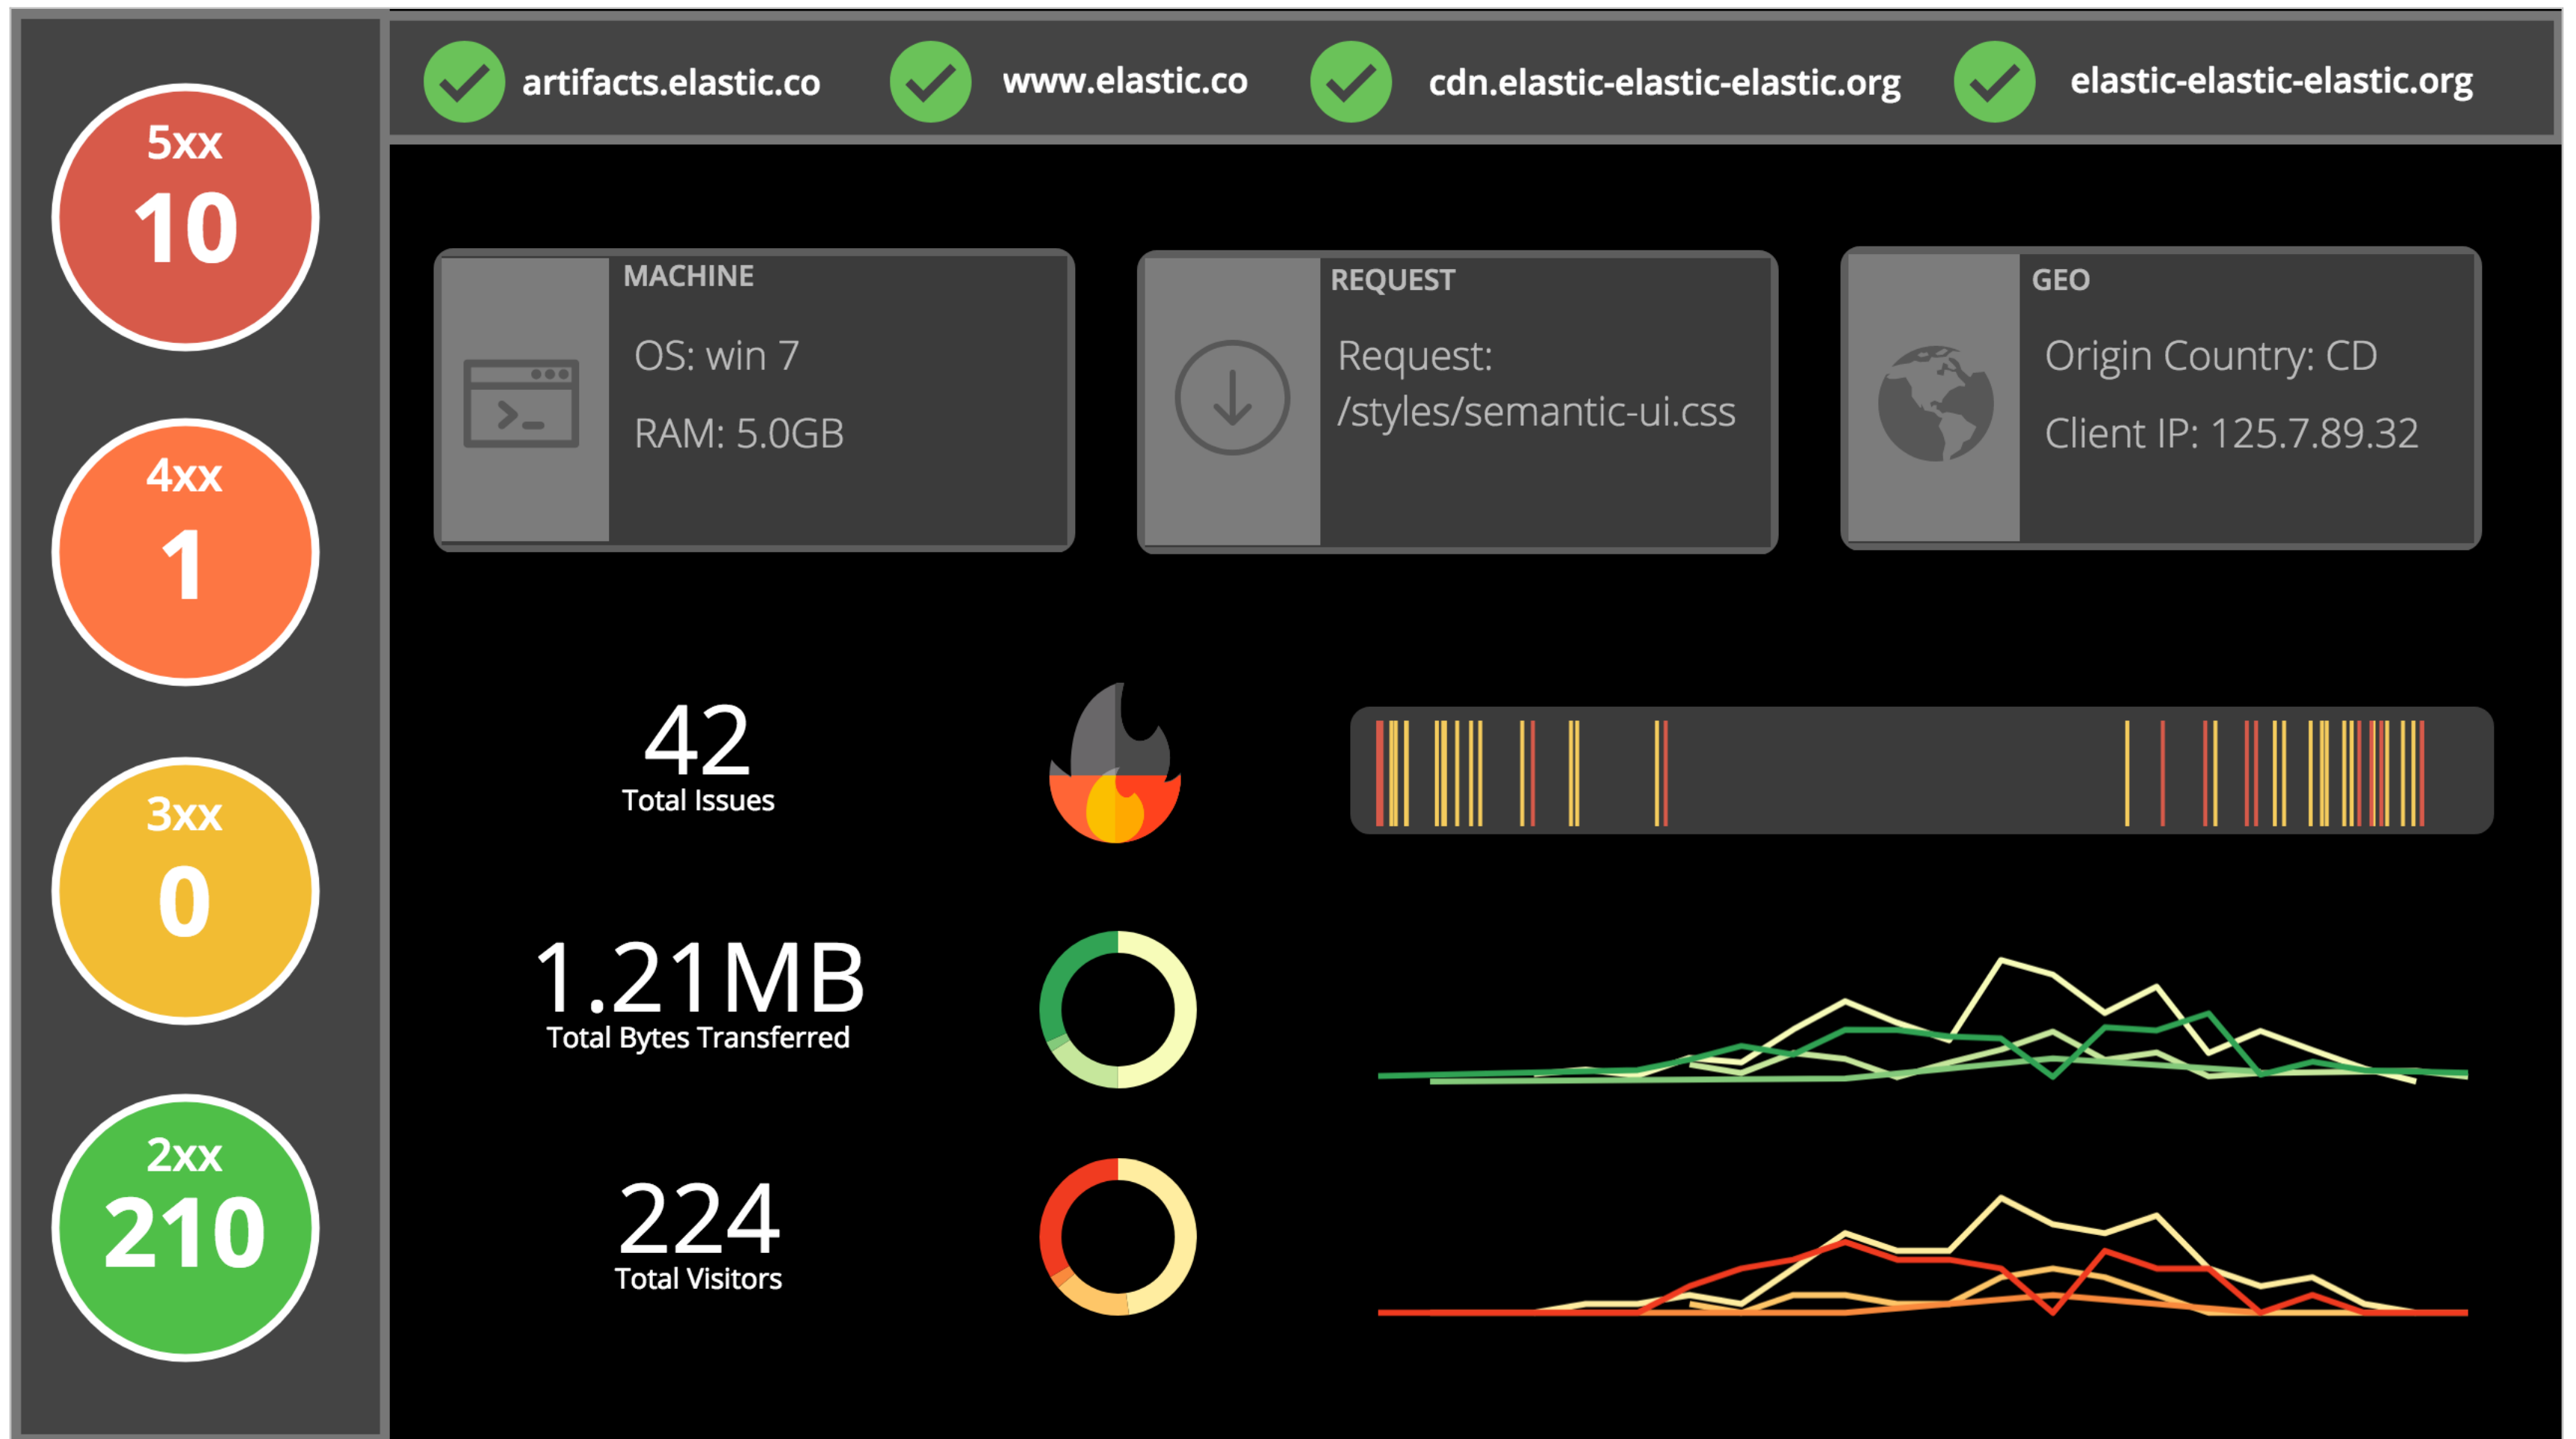

Last Updated: Aug 30th 2018 @ 12:22:00

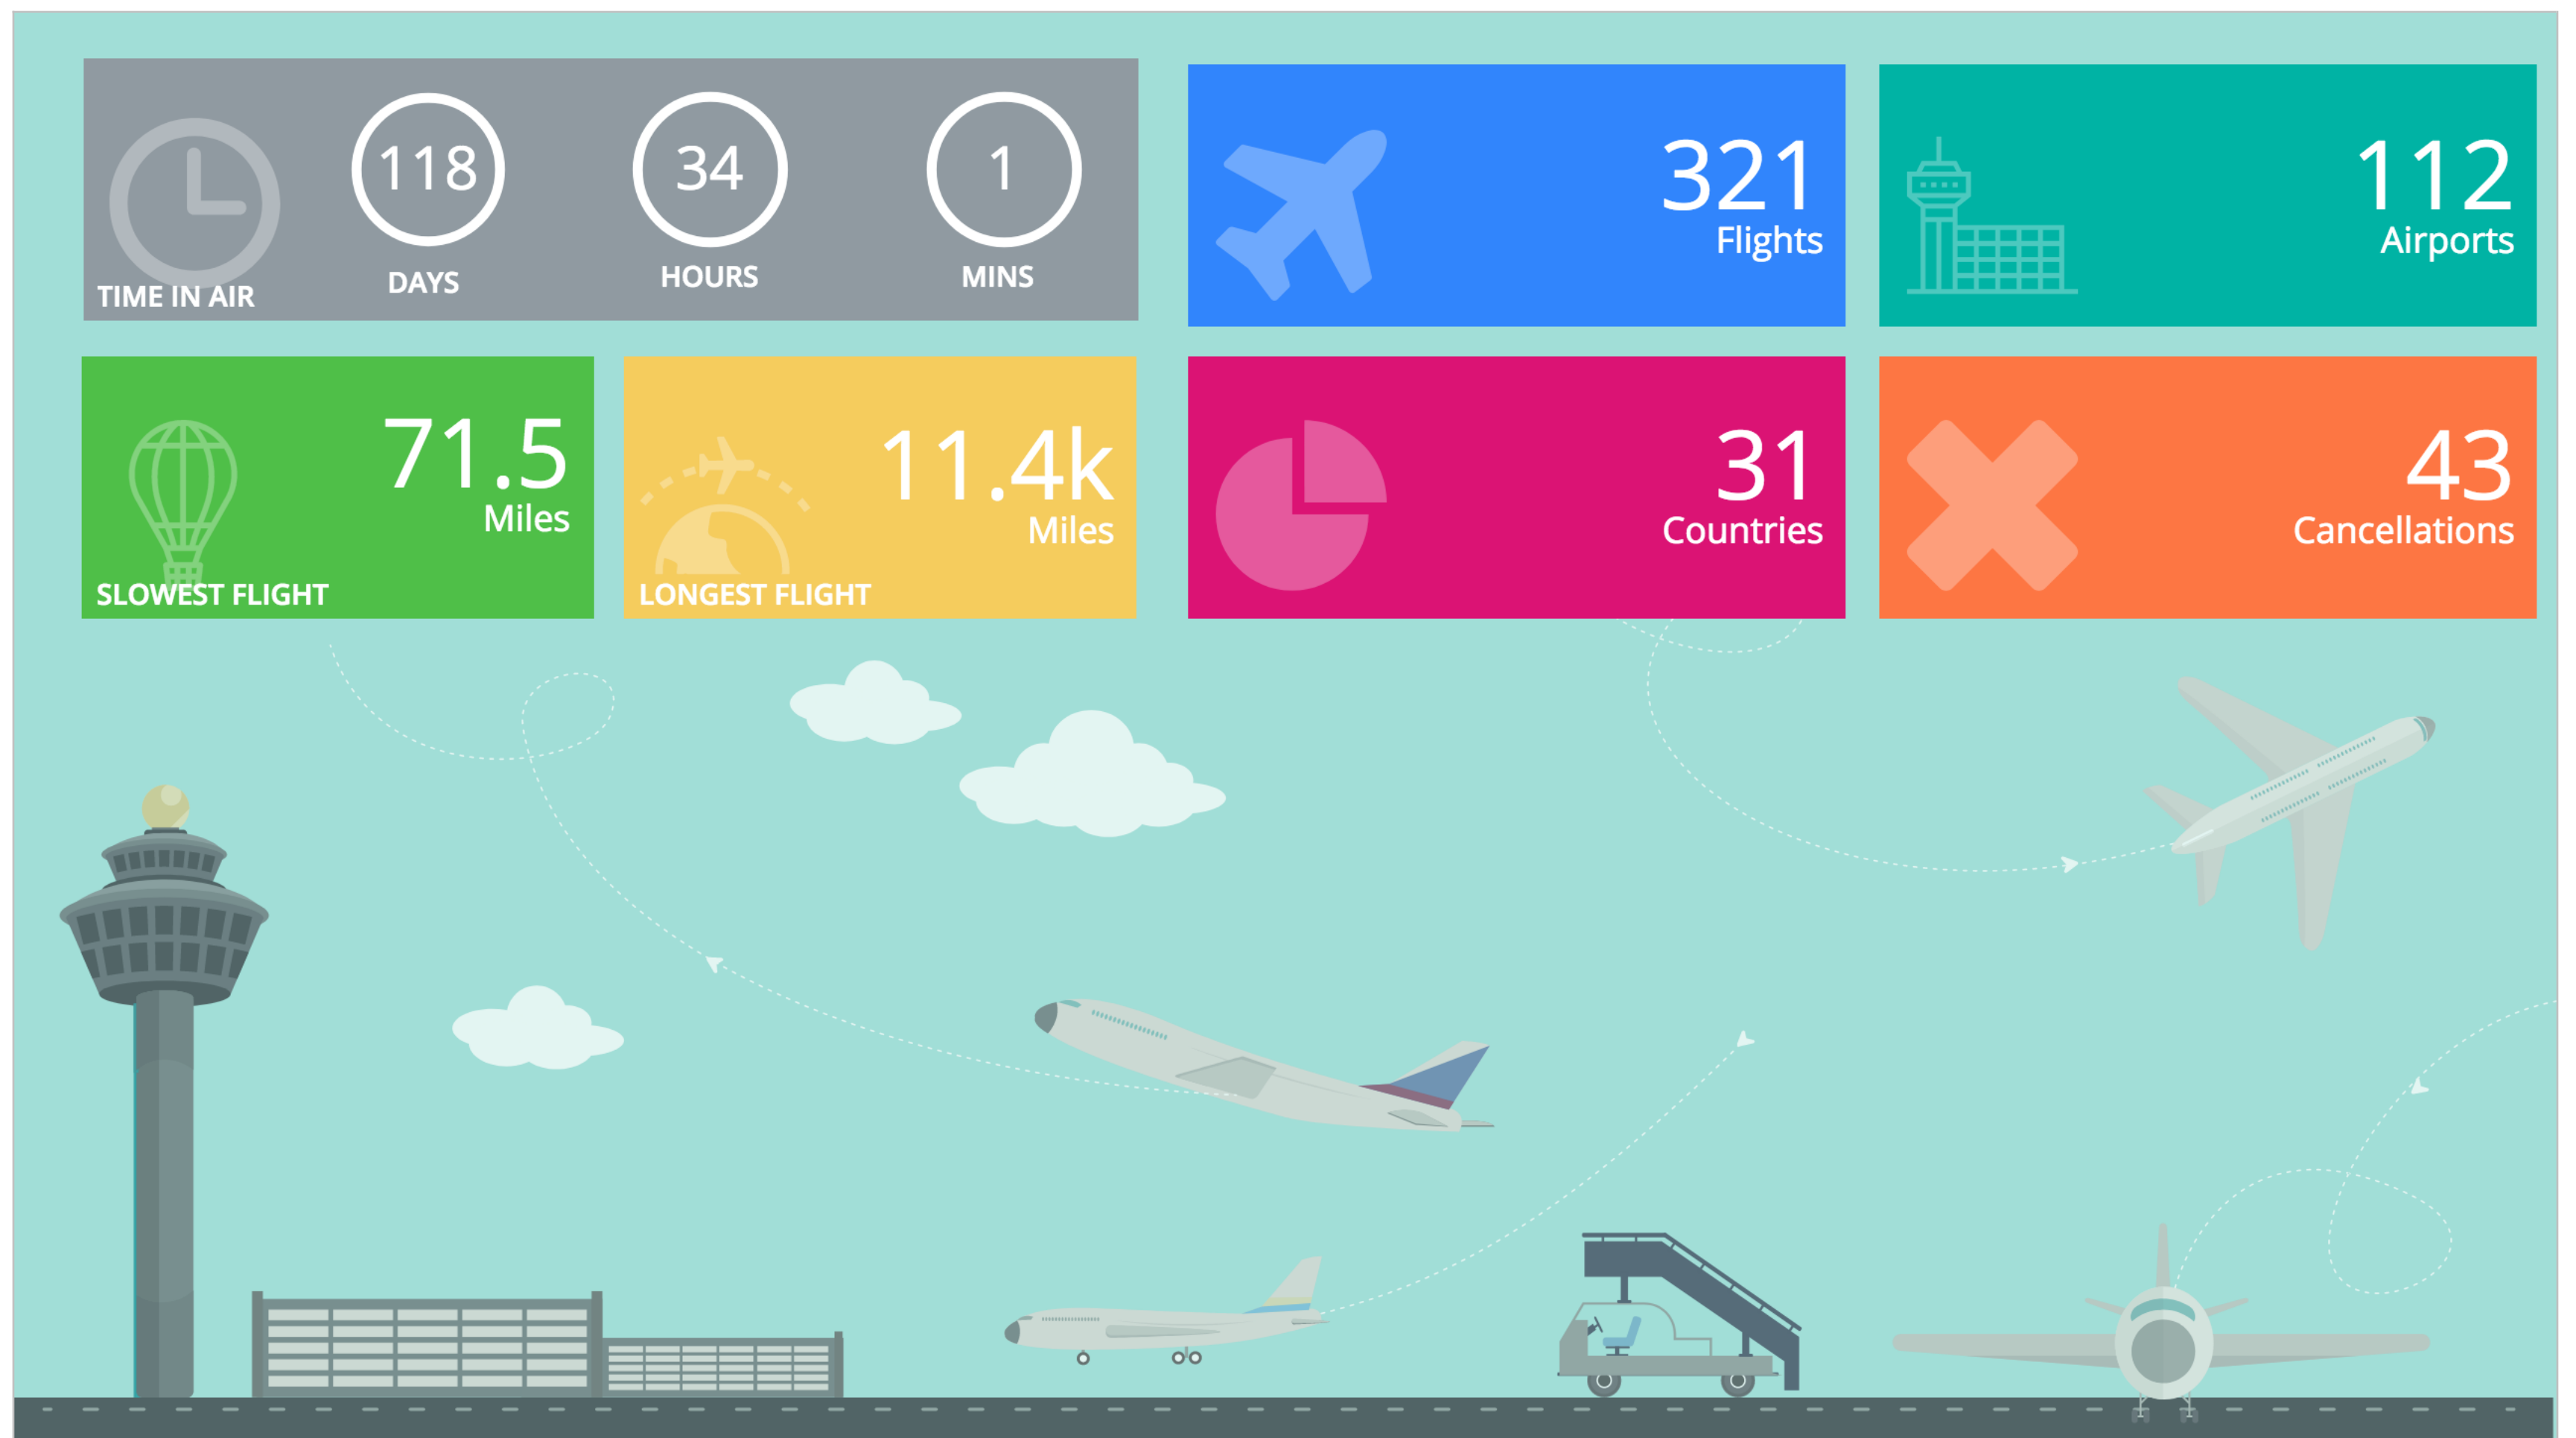

# What is Canvas?

It depends.

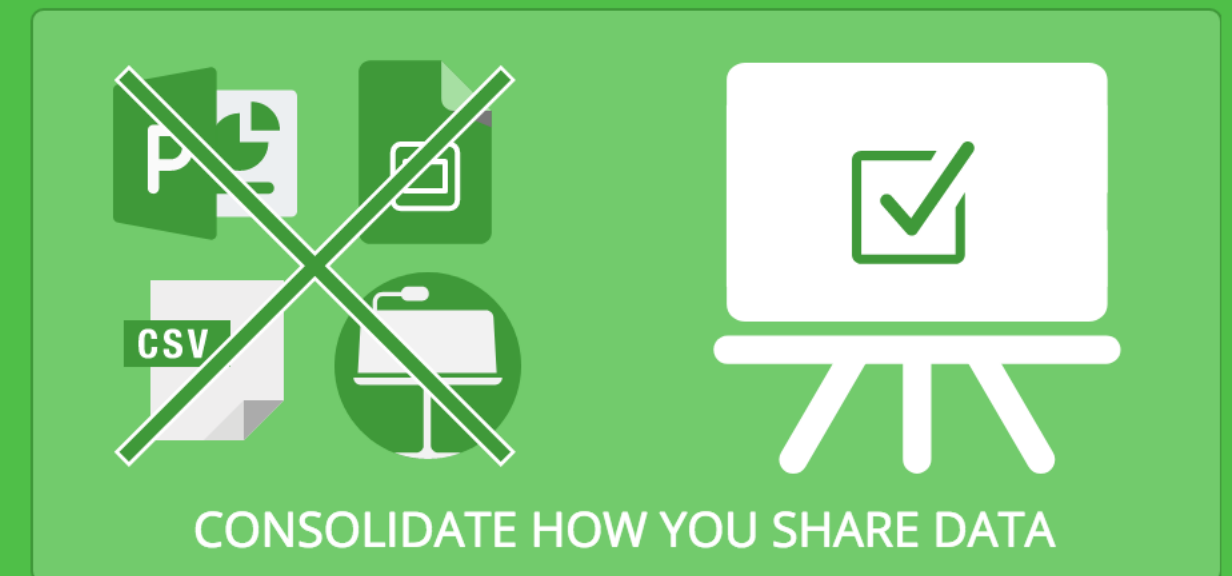

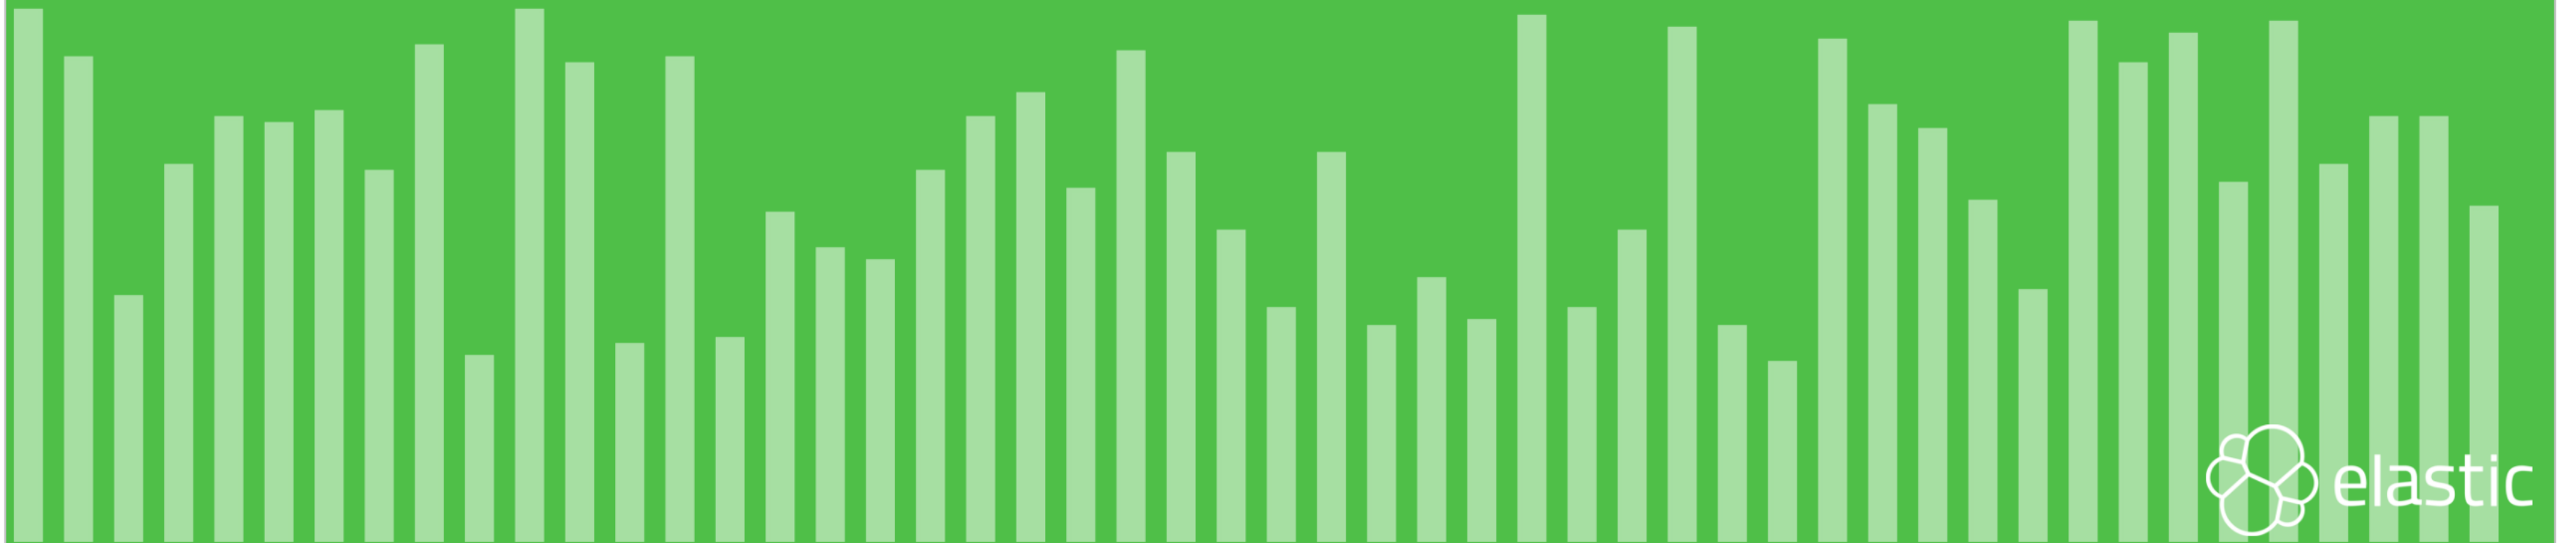

# Beyond the Dashboard

Live presentations

Report your metrics in **real time (12:22:35)** and never worry about it again.

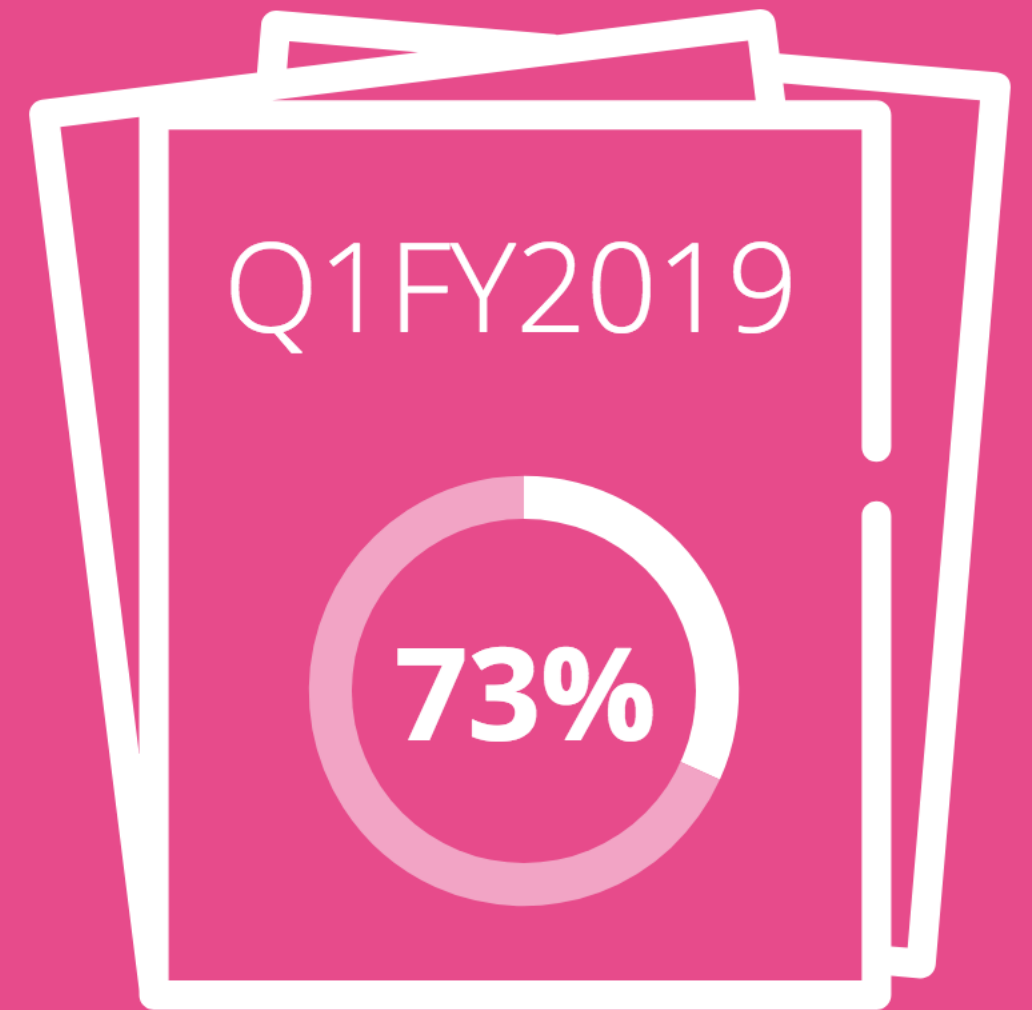

# 13.87k pixel perfect presentations

# Create your brand

## Customized reports

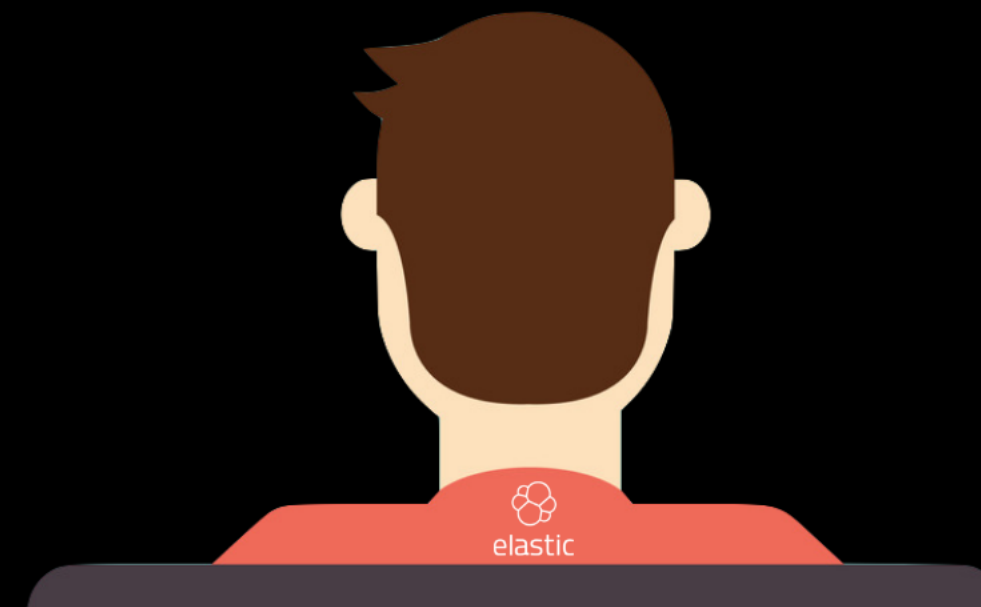

- Brand yourself, team or company
- No more time consuming report building processes
- Schedule on-demand, daily, weekly, monthly or conditionally send reports
- **2.77m** total reports generated

# KPIs, KPIs, KPIs

NOCs, SOCs and Kiosks

- Completely customize your data for the big screen
- Tie in conditional logic and take full advantage of Canvas elements
- Show off your data the way you want, for internal and external customers

# A curated experience

## Tiny applications

### Choose Timeframe

Last 24 hours

### Choose Operating System

# That familiar feel

## SQL Query Syntax

```
SELECT SUM(total_downloads) AS downloads FROM  
canvas_stats
```

**74.2m**

```
SELECT SUM(total_downloads) AS downloads FROM  
canvas_stats  
WHERE country = 'US'
```

**9.1m**

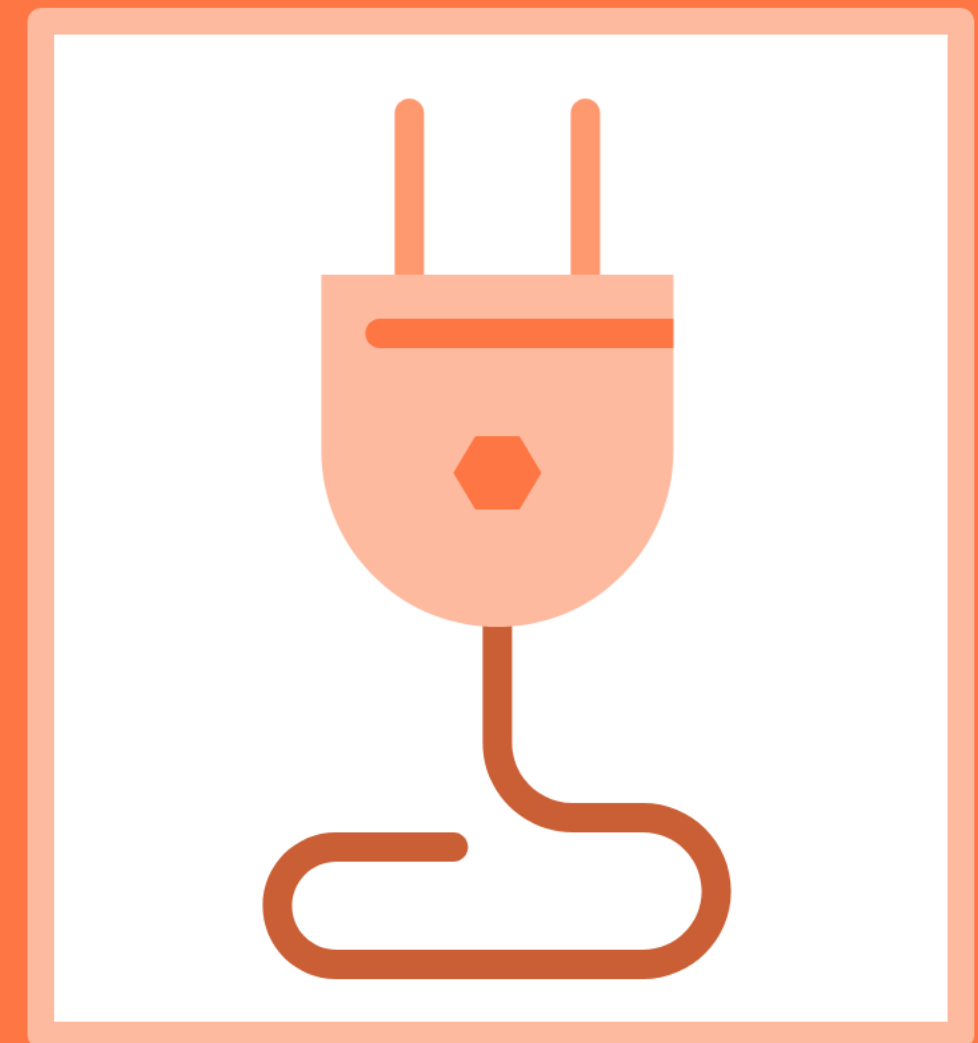

```
SELECT os, SUM(total_downloads) AS downloads FROM  
canvas_stats  
WHERE country = 'US'  
GROUP BY os ORDER BY os DESC
```

os <small>↑</small>	downloads <small>#</small>
ios	2766022
osx	2410371
win 7	1432103
win 8	1204562
win xp	1260377

# Plug n' Play

A rich, but simple, plugin system

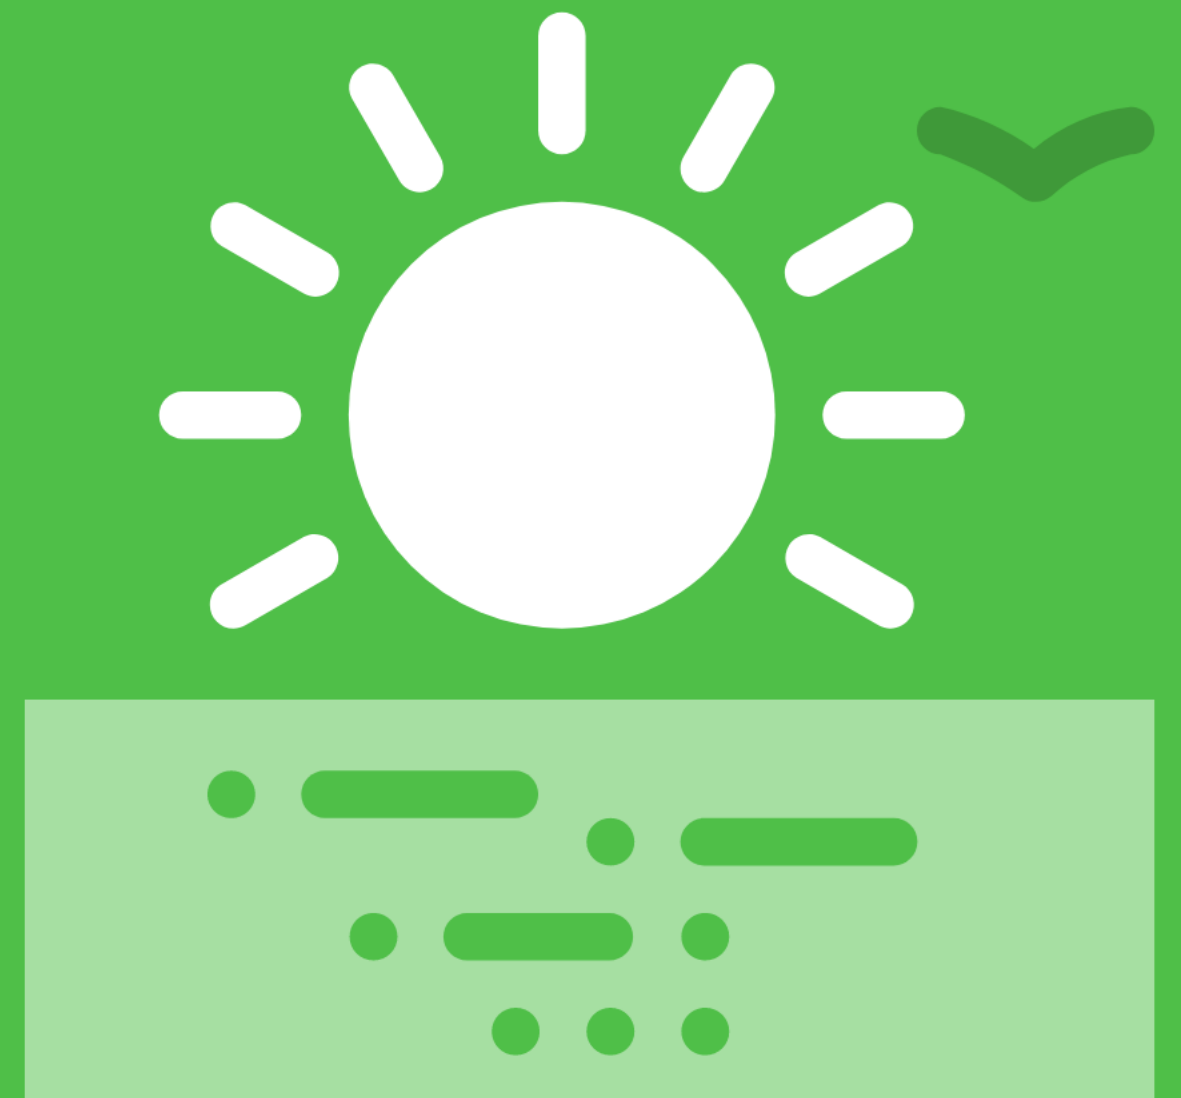

- **Elements** that use existing functionality in new ways, without new code
- **Rendering** functions that encourage copy-paste development
- **Data sources** that fetch all new information, and **functions** that manipulate it.

# On the horizon

What lies ahead?

- **Beta release** as part of our free license tier
- **PDF reporting** integration
- **Grouping of elements** for faster workpad creation
- **Templated workpads and elements** for content generation and re-use
- **Geo elements** and location aware functions
- **Fully embeddable** workpads
